BitLoTop (BLOT) — Official Whitepaper

Updated: October 2025

Overview

Token Name	BitLoTop
Symbol	BLOT
Blockchain	BNB Smart Chain (BEP-20)
Total Supply	1,000,000,000 BLOT
Transaction Fee	0.1% per transaction
Final Contract Address	0x8A128ae8eDe9Be9CC

Contract History & Transparency

Version	Address	Date	Status
V1	0x6Cd7C4ab...80A82031E	2025-10-14	Burned (sent to dead wallet)
V2	0xC32D6714...36D7dDA79	2025-10-14	Burned (sent to dead wallet)
V3	0x37990762...e14005605	2025-10-14	Burned (sent to dead wallet)
V4 (Final)	0x8A128ae8...eDe9Be9CC	2025-10-14	Active & Verified

All earlier versions were permanently sent to the burn address (0x000000000000000000000000000000000000dEaD) to ensure transparency and prevent reuse.

Burn Strategy

BitLoTop follows a gradual burn model. Tokens and liquidity are burned periodically over time based on transaction volume, staking, and buyback events. This approach maintains long-term deflation and market balance.

Liquidity & Security

Liquidity is locked for community trust and stability via Mudra Locker with on-chain proof.
Transaction Proof: https://bscscan.com/tx/0x57d3f94c4135128273819a49fdc3cd258ff21fc2ff8da46ba71b3a1181669842

Tokenomics

Category	%	Description
Public Pool	50%	Circulating supply for trading & staking
Strategic Reserve	30%	Team, treasury, marketing
Liquidity Pool	15%	Locked on PancakeSwap
Community Rewards	5%	Airdrops, staking bonuses

Vision

BitLoTop reinvests real-world business profits into its ecosystem to create a stable, growth-oriented token built for transparency and community empowerment.

Team

Founder & Governance Architect — Bryn Voss
Treasury & Compliance Lead — Imani Ortega
CTO & Blockchain Architect — Tarek Lin
Privacy Systems Lead — Leora Nash
Validator & Infrastructure Lead — Oren Silva
Smart Contract Engineer — Tova Mendel
Community & DAO Product Manager — Olaya Serrano
Core Developer — Pasha Velez

Roadmap Snapshot

Phase 1: Token Deployment ·   Audit ·   Liquidity Lock
Phase 2: Marketing ·   Airdrops ·   Community Onboarding
Phase 3: Staking ·   Exchange Listings ·   Governance
Phase 4: DAO Transition ·   Treasury Activation

Final Thoughts

BitLoTop (BLOT) is a transparent, community-first token that combines decentralized finance with real-world investment opportunities. Its gradual burn model and locked liquidity provide a foundation for long-term stability and sustainable growth.
