

BitLoTop (BITLOTOP)

A crypto lot to rise to the top

About

BitLoTop (BITLOTOP) is a crypto token that helps people grow their digital wealth. It combines crypto power with real-world business investments. Profits from these businesses are reinvested into the token to keep it strong and stable. BitLoTop's goal is to turn a bit into a lot — for everyone in the community.

Vision

BitLoTop reinvests real-world business profits into its ecosystem to create a stable, growth-oriented token built for transparency and community empowerment.

Utility

- Staking and yield rewards

- Community and referral bonuses
- Real-world profit sharing
- DAO governance for holders

Burn Strategy

BitLoTop follows a gradual burn model. Tokens and liquidity are burned periodically over time based on transaction volume, staking, and buyback events. This approach maintains long-term deflation and market balance.

Liquidity & Security

Liquidity is locked for community trust and stability via Mudra Locker with on-chain proof.

Transaction Proof
